CONSENT FOR BILLING AND TREATMENT

PLEASE READ CAREFULLY AND INITIAL EACH SECTION

SLO Wellness Center (SWC) is a partnership between Stevens Chiropractic Inc., Sachs Chiropractic Inc., and Casparian Chiropractic Inc. SWC invites you to discuss with us any questions regarding your care and our services.

I consent to the performance of chiropractic adjustments and other chiropractic procedures by SWC D.C.'s including: Dr. Molly Stevens, Dr. Rex Stevens. Dr. Sandy Sachs, Dr. Aram Casparian and Dr. David Johnson as well as authorize SWC and whomever they designate to administer treatment as they deem necessary.

I authorize my provider(s) and/or managed care organization to release my information to provide other health care providers with information related to my care as well as to process insurance claims.

I have read, or have had read to me, the above consent. By signing below I agree to chiropractic services and intend this consent form to cover the entire course of treatment for my present condition(s) and for any further condition(s) for which I seek treatment in this office.

ACKNOWLEDGEMENT OF RECEIPT OF NOTICE OF PRIVACY PRACTICES

I understand and have been provided with the opportunity to review a Notice of Privacy Practices. The Notice of Privacy Practices describes the types of uses and disclosures of my protected health information that might occur in my treatment, payment of my bills or in the performance of SLO Wellness Center health care operations. The Notice of Privacy Practices also describes my rights, SLO Wellness Center duties with respect to my protected health information. The Notice of Privacy Practices is posted by the front desk.

SLO Wellness Center reserves the right to change the privacy practices that are described in the Notice of Privacy Practices. I may obtain a revised Notice of Privacy Practices by calling the office and requesting a revised copy be sent in the mail or asking for one at the time of my next appointment.

SLO Wellness Center may need to use my name, address, phone number, and my clinical record to contact me with appointment reminders, information about treatment alternatives, or other health related information that may be of interest to me. If this contact is made by phone and I am not at home, a message will be left on my answering machine. By signing this form, I am giving SLO Wellness Center authorization to contact me with these reminders and information.

INFORMED CONSENT FOR CHIROPRACTIC CARE

PLEASE READ CAREFULLY AND SIGN BELOW

You are the decision maker for your health care. Part of our role is to provide you with information to assist you in making informed choices. This process is often referred to as "informed consent" and involves your understanding and agreement regarding the care we recommend, the benefits and risks associated with the care, alternatives, and the potential effect on your health if you choose not to receive the care.

We may conduct some diagnostic or examination procedures if indicated. Any examinations or tests conducted will be carefully performed but may be uncomfortable.

Chiropractic care centrally involves what is known as a chiropractic adjustment. There may be additional supportive procedures or recommendations as well. When providing an adjustment, we use our hands or an instrument to reposition anatomical structures, such as vertebrae. Potential benefits of an adjustment include restoring normal joint motion, reducing swelling and inflammation in a joint, reducing pain in the joint, and improving neurological functioning and overall well-being.

It is important that you understand, as with all health care approaches, results are not guaranteed, and there is no promise to cure. As with all types of health care interventions, there are some risks to care, including, but not limited to: muscle spasms, aggravating and/or temporary increase in symptoms, lack of improvement of symptoms, burns and/or scarring from electrical stimulation and from hot or cold therapies, including but not limited to hot packs and ice, fractures (broken bones), disc injuries, strokes, dislocations, strains, and sprains. With respect to strokes, there is a rare but serious condition known as an "arterial dissection" that typically is caused by a tear in the inner layer of the artery that may cause the development of a thrombus (clot) with the potential to lead to a stroke. The best available scientific evidence supports the understanding that chiropractic adjustment does not cause a dissection in a normal, healthy artery. Disease processes, genetic disorders, medications, and vessel abnormalities may cause an artery to be more susceptible to dissection. Strokes caused by arterial dissections have been associated with over 72 everyday activities such as sneezing, driving, and playing tennis.

Arterial dissections occur in 3-4 of every 100,000 people whether they are receiving health care or not. Patients who experience this condition often, but not always, present to their medical doctor or chiropractor with neck pain and headache. Unfortunately a percentage of these patients will experience a stroke.

The reported association between chiropractic visits and stroke is exceedingly rare and is estimated to be related in one in one million to one in two million cervical adjustments. For comparison, the incidence of hospital admission attributed to aspirin use from major GI events of the entire (upper and lower) GI tract was 1219 events/ per one million persons/year and risk of death has been estimated as 104 per one million users.

It is also important that you understand there are treatment options available for your condition other than chiropractic procedures. Likely, you have tried many of these approaches already. These options may include, but are not limited to: self-administered care, over-the-counter pain relievers, physical measures and rest, medical care with prescription drugs, physical therapy, bracing, injections, and surgery. Lastly, you have the right to a second opinion and to secure other opinions about your circumstances and health care as you see fit.

I have read, or have had read to me, the above consent. I appreciate that it is not possible to consider every possible complication to care. I have also had an opportunity to ask questions about its content, and by signing below, I agree with the current or future recommendation to receive chiropractic care as is deemed appropriate for my circumstance. I intend this consent to cover the entire course of care from all providers in this office for my present condition and for any future condition(s) for which I seek chiropractic care from this office.
